As originally written, the wind speed criteria in the 2012 IRC (residential code) and the 2012 IBC (commercial code) is ASCE 7-10 based 139 mph ultimate 3-second wind speed velocity. However the Houston Amendments to the 2012 IRC (the IBC remains un-amended on this point) changes the wind speed criteria to ASCE 7-05 based 110 mph, 3
