

## TECHNICAL PRESENTATION

January 10, 2024

### **The Use of Injection Grouts for Stopping Water and Stabilizing Soils in Industrial and Geotechnical Applications**

Presented by [Mr. Billy Jalomo](#) with [Avanti Grout](#)

**BIO:** Mr. Billy Jalomo is the West/South Central Regional Manager with Avanti Grout.

**PRESENTATION SUMMARY:** The use of injection grouts for stopping water and stabilizing soils in industrial and geotechnical applications was discussed in detail. This presentation focused on the knowledge needed to make decisions in the field, using technologies and techniques for achieving maximum results, and a commonsense approach to

problem solving with injection of acrylic, polyurethane and cementitious grouts.

Multiple examples were provided that illustrated the many different types of grout products from cementitious grouts to synthetics such as polyurethane. The different conditions conducive to different grout products and methods were also discussed at length.
